

The background is a dark, atmospheric illustration of a Halloween night scene. At the top, several white spider webs are strung across the frame, with small white spiders hanging from them. In the center, the title 'The Last Quest' is written in a large, red, cursive font. To the left, a black silhouette of a tree branch is visible, with a white spider on it. In the background, a yellow light source, possibly a street lamp, illuminates a dark bench. Several black bat silhouettes are flying in the dark sky. At the bottom right, another white spider web is partially visible.

The Last Quest

WHO KILLED THEM ?

MAILLET JULIA – 202612057

VERITY ZOE REDDY – 202612188

 **PSYCHOLOGICAL HORROR**

 **MYSTERY / THRILLER**

 **INTERACTIVE FICTION**

Genre

A short branching horror story combining mystery,
suspense and player choices.

Target Audience

Teenagers & young adult - approximately 16-30

People who enjoy :

- 🩸 Horror and Psychological suspense
- 🔍 Mystery and murder investigations
- 🎮 Interactive stories and choices
- 🧩 Trying to discover hidden clues
- 👻 Halloween / dark atmosphere

The game is designed for players who enjoy short, cinematic horror experiences where their decisions can lead to different endings.

Main Character

JAMES

James is a university student who arrives late to a Halloween party.
When he arrives, he discovers that his friends have been murdered.

His goal is to:

 Find out what happened

 Discover who the killer is

 Survive the night

But the more James
investigates, the more the
evidence seems to point
toward him.

Player Actions

INVESTIGATE

Search the house and examine clues.

MAKE DECISIONS

Choose what James says and which clues he follows.

TAKE RISKS

Explore dangerous areas, call the police or try to escape.

PLAYER CHOICE

DIFFERENT CONSEQUENCE

Stay inside and
investigate

Run outside and call the
police

Tell the detective everything

Lie and say he never entered the house

Competitive Until Dawn

Interactive
Horror
Game

WHY IS IT SIMILAR?

Like The Last Guest, Until Dawn combines horror, mystery and player choices that influence what happens next.

STRONG POINT

Choices have real consequences:
the player's decisions can
determine which characters
survive and how the story
develops.

Why it's strong:

It makes the player feel
responsible for the outcome.

WEAK POINT

Large and complex story: the
game has many characters,
locations and branching paths.

Why it's weaker for our
project:

It can make the story harder to
follow and requires much more
time to play.

The Last Guest focuses on one main character and a shorter, more concentrated mystery.

WHAT WE CAN LEARN FROM UNTIL DAWN

STRONG POINT: ATMOSPHERE

Dark lighting, isolated locations and suspense create a constant feeling of danger.

WEAK POINT:

TOO MUCH INFORMATION

The large number of characters and storylines can reduce the focus on the central mystery.

WHAT WE CAN LEARN FROM UNTIL DAWN

DARK LIGHT → TENSION

ISOLATED LOCATION → VULNERABILITY

OUR APPROACH:

One protagonist + one location +
one central mystery

Competitive Analysis: Scream

WHY IS IT SIMILAR?

Scream combines a murder mystery with suspense, fear and the uncertainty of who the killer is.

STRONG POINT

Mystery & Suspicion: the audience constantly questions who the killer could be.

This keeps people engaged because they want to discover the truth.

WEAK POINT

The audience cannot control the story: viewers can only watch the characters make decisions.

Our game adds interactivity: the player makes those decisions themselves.

WHAT WE CAN LEARN FROM SCREAM

STRONG POINT: SUSPENSE

The killer is kept mysterious, making ordinary situations feel dangerous.

WEAK POINT: LINEAR STORYTELLING

The audience follows one predetermined storyline.

WHAT WE CAN LEARN FROM SCREAM

OUR APPROACH:

In The Last Guest, the player decides what James does.

Instead of only watching a horror story, the player becomes part of it.
